## **DETAILED ACTION**

## Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The examiner deems Ueda et al (6,842,580) to be the closest prior art of record.

Ueda et al disclose a method for reproducing real-time data from an information recording medium (Col 1, lines 9-14) comprising a volume space for at least recording in sectors a file comprising data and file management information for managing the file (Fig 26) wherein:

- the real-time data comprises at least one of video data and audio data (Col 1, lines 9-14);
- the real-time data is recorded in at least one real-time extent each of which is allocated with logically contiguous sectors within the volume space (Fig 26);
- a linking loss extent for recording invalid data in the at least one real-time extent (Col 2, lines 57-64);
- determining whether or not the file recorded on the medium is a real-time
   file containing the real-time data (Col 40, lines 54-59); and
- Ueda et al suggest performing a reproduction operation for the real-time
  data recorded in the at least one teal-time extent, the reproduction
  operation being continuously performed without performing a recovery
  process even if a reproduction error due to invalid data recorded in the
  linking gap occurs (Col 18, lines 25-28).

Application/Control Number: 09/882,026

Art Unit: 2616

The prior art does not disclose, suggest, or teach the recited linking gap of claims 86 and 87, wherein the linking gap is a region which overwrites an already-recorded area through appending.

The prior art also does not disclose, suggest, or teach the recited linking loss extent being positioned before each of the at least one real-time extent as recited in claims 86 and 87.

A careful comparison was made with claims in the parent patent granted to Gotoh et al (6,839,504). That patent discloses a medium, method, and apparatus for recording data on a medium that uses the formula described in the application to calculate buffer underflow, but do so with a recording on a medium that is not appended, in contrast to this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Fletcher whose telephone number is (571) 272-7377. The examiner can normally be reached on 7:45-5:45 M-Th, first Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
